Methodology & Risk Analytics Definitions

- Sharpe Ratio: Calculated relative to a Risk-Free Rate of 6.5%, using annualised daily standard deviation based on 252 business days per year.
- Risk Grade: Assigned using the AMFI standard risk profile ranges.
- Portfolio Concentration (HHI): Measured using the Herfindahl-Hirschman Index across asset holdings. Scores below 0.15 indicate low concentration (diversified), while scores above 0.25 indicate high concentration.
